

Devion Wilson

Cover Letter

Hi,

My name is Dev, I am a dedicated technology professional with a drive to learn and grow. I have worked in the IT field for roughly four years focusing on mostly devops related work. I have experience working with kubernestes (hosted and GKE), automation technologies such as Jenkins and bamboo, coding with puppet and chef and troubleshooting miscellaneous issues when problems arise. I feel I will be a great addition to the team as I will bring a positive attitude, great work ethic and a drive to learn and grow with the company. I look forward to hearing from you soon!
